Clinician, Senior Clinician, Assistant, Associate, or Full Professor - Theriogenologist

The College of Veterinary Medicine at Iowa State University is seeking applications for a full-time, tenured, tenure-track, or clinical track position focused on food animal and small ruminant theriogenology in the department of Veterinary Diagnostic and Production Animal Medicine (VDPAM). Applications will be accepted at the clinician or senior clinician, assistant, associate, or full professor levels. The primary responsibilities of the position will include teaching bovine and small ruminant theriogenology to veterinary students and providing theriogenology services to clients of the Embryo Transfer and Advanced Reproductive Techniques unit, the Food Animal and Camelid Hospital, and the Veterinary Field Services unit. The person in this position will also be expected to provide consultative support on best practices in herd reproductive disease diagnosis and management to veterinarians and livestock producers in the region. The successful candidate will have the opportunity to develop an independent or collaborative research program in theriogenology. Please refer to www.iastatejobs.com, posting number 500039 to view the complete position description and requirements and to apply online. To ensure consideration, applications must be submitted online by May 15, 2015. Questions about the position can be directed to the search committee chair Dr. Terry Engelken (515-294-2192, engelken@iastate.edu) or VDPAM Chair Dr. Pat Halbur (515-294-6970, pghalbur@iastate.edu). Iowa State University is an EO/AA employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, or protected Vets status.
